

Swiss narrow gauge – Rhaetian Railway

RhB – Sliding door wagon Hai-v 5136 – 5140

Prototype:

Until 1970 RhB uses two-axled covered boxcars only. With their central door, loading was quite difficult. In 1970 RhB started with its first four-axled sliding-door-wagons. They could be loaded by machines, which was much quicker and efficient.

In 1992 the company bought further 11 vehicles.

The Hai-v 5136 - 5140 were set in motion in 1992. The measures outside were still the same, but they raised their capacity up to 30,0t.

The wagon has aluminium-doors with a great red lettering. You will find them all over the RhB-track.
