

Swiss narrow gauge – Rhaetian Railway

RhB – Stake car Rp-w 8351 – 8360

Prototype:

Wood is one of the most important freights of railways. RhB is going to transport about 100.000 tons a year. The wagons could be loaded easily: only a truck with a derrick is necessary. The falling trunks damage the stakes often. So RhB developed together with Cattaneo and JMR a new, stronger version of the R-w 8202 - 8212.

Built in 1993, the wagons were used first for container-transport in the Vereina-tunnel.

In 1997 stakes were mounted.

The Rp-w 8351 - 8360 have a capacity of 35,0t. You will find them all over the RhB-track.
