

Swiss narrow gauge – Rhaetian Railway

RhB – Container wagon Rp-w 8351 – 8360

Prototype:

When RhB decided, to develop their track through Vereina-tunnel, they also had to decide about a new vehicle, to transport the stones. Together with Cattaneo and JMR, RhB developed a new, stronger version of the R-w 8202 - 8212. This flatcar had fixtures for special containers, which could be taken from the wagon directly by a truck.

Built in 1993, the wagons were used first for container-transports in the Vereina-tunnel.

In 1997 stakes were mounted. The Rp-w 8351 - 8360 have a capacity of 35,0t.

You will find the containers all over the RhB-track today.
