On the fair of Stuttgart, at the 10th N-Convention, we have presented two new trainsets. All those fans who had no time to visit us there, will find all information in this first newsletter.

The Chemin de fer Montreux-Oberland bernois runs an extensive network on metre-gauge which connects the cantons of Bern and Waad. Between Zweisimmen and Montreux diversified trainservice is offered with several different panorama-, regio- and special-trains. The line connecting Lenk is used for regional passenger-trains only.

MOB-Lok Ge4/4 8001 - 8004

1 x loco Ge4/4 8001 - 8004 in ivory-dark blue

MOB-company owns four locos, which are very close to those of the Raetian railway. Differences are to be seen on the roof, because of the different current-systems of both networks. This company in the western part of Switzerland used DC for powering their rolling stock. The former painting was ivory and dark blue.

As new item for 2016 we have decided to offer this very attractive design as a model too. We have made the necessary changes on the roof top, the pantographs have changed their direction and are glued into the correct position.

We will offer three different versions, and in case of enough demand several roadnumbers.

Based on the Kato-item from the Glacier Express-box we offer the loco for track N (9mm) and regauged for Nm (6,5mm). Besides the changing on the roof, this item gets the freestanding handrails on the front, which are moulded in plastic on the original body only. For the friends of finescale, we will offer the same loco based on our nickel-silver body, with two Faulhaber-motors and two flywheels. This item is available in Nm only.

The new front appears much more realistic with the freestanding handrails. Having a close look to the roof-top, you can see the changes there also. If there is enough demand, we will offer all four different roadnumbers which ever ran on the tracks of MOB.

model	Price/Item-#
MOB Ge4/4 8001 - 8004 fast-train-loco of Montreux-Bernese Oberland-railroad based on Kato, gauge N (9mm)	EUR n.E. KT-021.1N
MOB Ge4/4 8001 - 8004 as above, gauge Nm (6,5mm)	EUR n.E. KT-021.1Nm
MOB Ge4/4 8001 - 8004 fast-train-loco of Montreux-Bernese Oberland-railroad finescale-item from nickel-silver, gauge Nm (6,5mm) only	EUR n.E. Nm-208.1
MOB Panoramic Express 2-coach-set (As, Bs) based on Kato, gauge N (9mm)	EUR n.E. KT-021.2N
MOB Panoramic Express as above, gauge Nm (6,5mm)	EUR n.E. KT-021.2Nm
MOB Panoramic Express Decalset für 2 coaches (As, Bs)	EUR n.E. KT-021.2D

MOB-coaches of Panoramic Express

1 x As 121ff. Panoramacoach in ivory-dark blue
 1 x Bs 261ff. Panoramacoach in ivory-dark blue

In addition to the loco, we have created some panorama-coaches which are similar to those famous of the Panoramic Express. Please regard that these items are fantasy-products. The coaches differ from the prototype and have no pendant on the MOB-tracks. Therefore the numbers of the coaches do not exist in the wagon-schedule of the company. These models will be offered in case of enough demand only, for track N (9mm) and for Nm (6,5mm).

Every type of wagon will have several roadnumbers for a longer train. Those who like to build this item by himself can choose our decalset to change the shell of the Glacier Express coach into a Panoramic Express one.

We do not attend to rebuild the brass-versions of Lemaco from 1989!

Prices will be announced on the International Toy Fair in Nuremberg 2016.

Jubilee-Train AB-Modell

2017 - 20th anniversary of AB-Modell

www.n-schmalspur.de

Our company was established on the 16th of May 1997. In November 1999 we offered the very first item, a sliding-door wagon type Haik-v. In the meantime we offer a wide range of different items and rolling stock because of your demand.

We say "Thank you very much for your confidence into our company".

The 20th anniversary is to be celebrated in 2017. That's the reason, why we decided to offer a very special trainset for this jubilee: a fasttrain loco Ge4/4" and convenient panorama-coaches, painted in the corporate design of our company.

Jubilee-loco Ge4/4 659

1 x loco Ge4/4 659 in white with AB-Modell-design

The jubilee-loco will be painted in snow-white and shows our logo on both sides of the body. The smaller logo is to be found at the front and under the cab-window. If the piont-lantern will be continued on the roof is not yet decided.

We offer three versions:

based on the Kato-loco, this item will run on 9 or 6,5mm track, freestanding handrails and weathered roof. Based on the finescale-loco in nickel-silver as narrow-gauge version only, with the well-known advantages of the Faulhaber-motors and two flywheels.

Even our jubilee-loco will get the freestanding handrails, independent if finescale- or Kato-version.

Jubilee-train with panorama-coaches

1 x Panoramacach 1st class in white with AB-Modell-design
 1 x Panoramacoach 2nd class in white with AB-Modell-design
 Additional trainset with two coaches as mentioned above, plus
 1 x Panoramabarcoach in colourful AB-Modell-design

As the loco is, the coaches get a snow-white painting too with red air-conditions on the roof. The track-element in the red beam and the small logo is decorated at the side of the body. An exception is the bar-coach, which receives the high-altitude mountain-view, which is part of our logo. All coaches have interiors which are coloured by hand. We will add some travellers from Preiser to give an extra touch of life to these items. The models are based on the Kato Glacier Express-coaches and will be offered for N- and Nm-tracks.

This special series will be sold on 05-16-2017 only and has to be ordered until 09-30-2016. We will offer the demanded quantity only. Trainset includes certificate of origin and continuous numbering of all items. Please regard: there is no prototype of this train on the track.

The panorama-bar (below) has a total different design compared with the first and second class panorama-coaches.

model	Price/Item-#
Ge4/4 659 - AB-Modell Jubilee-loco, white, 20 years of AB-Modell -limited run-based on Kato, gauge N (9mm)	EUR n.E. KT-020.1N
