Bernina Express-Panorama coaches

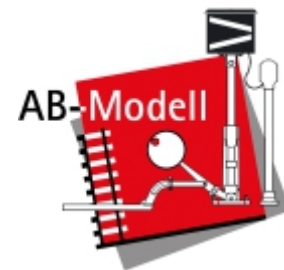

At the Nuremberg Toy Fair 2017, we have launched the new edition of the well-known Panorama coaches of the Rhaetian Railway announced in the newest version. Meanwhile the railroad company gave the vehicles a newer look, that we like to join in to our program.

Read all the important details in today's newsletter.

We wish you a lot of reading pleasure.

Yours

For many years now, panorama cars have shaped the image of express trains over the Bernina pass.

In several tranches, the fleet was procured and the older vehicles adapted to the appearance. So the partly visible tool- and technique-boxes were closed

After a few years of use, the red paint was so heavily attacked by the weather that the vehicles had to be repainted. But instead of reaching for the paint gun, the cars were completely covered with foil.

In this context the vehicles received again the lettering

Nm-111.R

Art.-Nr./item-no./produit-no.

On request, we equip your vehicles with a few passengers, so that the models do not have to drive empty over the layout. The offer includes the adaptation and gluing of manufacturer-specific available figures in sets of 6. The vehicles can be equipped with a maximum of 3 sets of 6 figures. The interior visible on the picture is not part of the product, but serves to illustrate a typical scene in a coach.

All models are made entirely of etched nickel-silver and are assembled in our workshop in elaborate hand work, painted and test-driven before they are delivered. The model should be reproduced as close to prototype as possible. This can be seen for example on the very detailed end walls, on which handrails, hoses and the diaphragms are attached.

The extensive description of the originals is also implemented as far as possible in the model.

The models are equipped with the Micro-Trains-Line coupling for Nn3 and are therefore compatible with our previous models. The wheelsets are made of metal and roll tip-mounted in bogies similar to the original, for much fun while playing on your layout.

Just for the sake of completeness it should be mentioned that our models need a suitable narrow gauge track in the gauge 6.5mm. A use on 9mm N-track is not possible. The vehicles are kept in exact scale 1: 160 and equipped with elaborate interior.

Differences of the Models

The most striking difference is the different lettering of the vehicles, which is mainly shown on the side wall by replacing the RhB with the Bernina Express-logo. The lettering RhB - Rhaetian Railway can now be read in the extended red bar on the door.

Instead of blue brake triangles, yellow diamonds are now glued on.

Under the vehicle floor, the more modern first-class vehicle has the latest bogies, while the converted second-class model still rolls on the classic bogies.

Our model photos do not show all changed details yet. These will be done in serial production so that you will receive models in current finish.
