

Novelties Presentation Bernina Express-Panorama Coaches

Kato has been offering its Bernina Express panorama car for several years now. Meanwhile the Rhaetian Railway redesigned the vehicles. We are happy to take the new design into our program. Read all the important details in today's newsletter.

We wish you a lot of reading pleasure.

Yours

The decalset contains all the essential components to redesign the "normal" panorama coaches into the latest labeling scheme of the RhB.

With our decalset, you can easily decorate the Kato models from the start and / or add on-set into the latest look of the models. These include the large Bernina Express lettering with the edelweiss, and the long red stripes for the doors with indication of the railway company included in the set. Two or four new vehicle numbers also give you the opportunity to change the models in previously unpublished vehicles.

ready-to-run / deliveries

For 2019, we plan to implement already redesigned Kato-based models, both as a normal and a narrow gauge variant. We redesign the models completely, including a new roadnumber, and protect the decals with a fine matt finish.

Your choices are:

KT-009.2 4-piece supplementary set with a first class and three second class coaches.

KT-008.4 2-part starter set, each with a coach Api and Bps (without locomotive - as long as stocks last).

Usually the coaches roll on N-tracks, we also offer them regauged to Nm.

The offer applies only in case the same models are not announced by Kato / Noch.

All models are offered at an attractive early-bird-price. Please note the pre-order period 31.03.2019 for the novelty of the next year. The delivery will take place during the year 2019.

The decalsets are available at short notice from stock (about August 2018).

Current prices are published on our website under www.n-schmalspur.de.
