UNESCO world heritage-set

- 1 x loco Ge4/4III 650 "UNESCO world heritage"
- 1 x 1st class panorama-coach Ap 1316
- 1 x 1st class panorama-coach w/wheelchair compartment Api 1311
- 1 x panorama-restaurant WRp 3831
- 3 x 2nd class panorama-coach Bp 2532, Bp 2534 and Bp 2536

Since start of July we got the very first set of the newest KATO Glacier version with nice "UNESCO world heritage" painting. It has the same technique as the first locos of Ge4/4III of Rhaetian railway, so this train could be regauged to 6,5 mm too. Our decal-sets for optimizing the outside and inside of the wagons could be combined with this set too. Soon, very attractive new items may be on your layout, if you like.

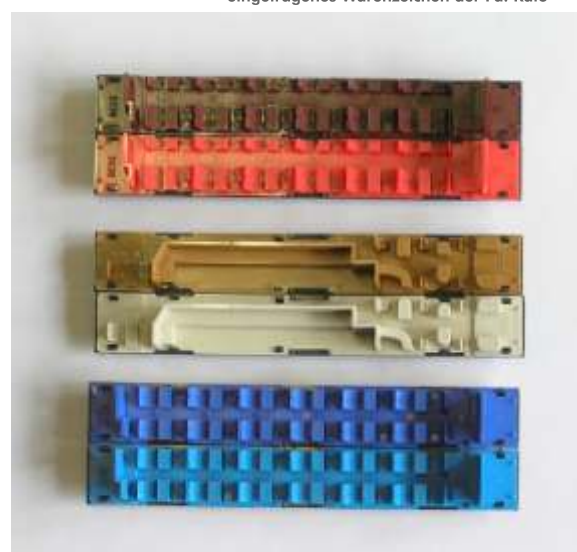

Several clients asked for Micro Trains-couplers at the loco. We made a lot of tests and have a solution now. It works fine after some adaptations. An informationsheet is in preparation.

The UNESCO-set is available in several variations:

- as loco and six wagon-pack,
- as loco and six wagon-pack, with optimized interior, 63 travellers inside and optimized outside, or
- as loco only.

If you are interested, we may combine a loco and two coaches only, or we assort a complete starter-set with power supply and track oval. Please ask for an offer.

Avail yourself of this opportunity: special early-order-prices valid until September 30th, 2014. Safe up to maximum 100,-- Euros! Delivery of these items will start from January 2015.

New numbers for the rolling stock is not all! The interior has changed too. KATO has changed the colour of the interior, from the very plastic-like looking light colours to more darker colourtones. Compare NEW and OLD (above and down).

The new Glacier Express-set with UNESCO world heritage-loco and six panorama-coaches from Kato, after being regauged to narrow gauge, equipped with Kato-couplers and shorter diaphragms. One can see the more discreet colours of the interior, which are darker now than in the very first sets.

UNESCO-trainset of Kato sets and additional equipment

Kato models are built in the typical Japanese scale of 1:150 for N-scale. They are casted from high quality plastics and very detailed printed. Loco has a motor with flywheel and lightning which changes with the direction.

KT-005.3Nm: RhB Ge4/4^m 650 UNESCO Welterbe, f. Nm, mit Katokupplung. Hersteller Kato (1:150)
