### Accessories

N-Track had already announced last year that they were working on a new overhead line. Now the novelties are presented and in addition to two completely new types of catenary, interesting accessories will be released to further enhance the model railway layout.

We will deal with the topic of catenary in a later newsletter. Today the focus is on the accessories. They are available from stock.

### Modern Benches

**Nm-Y00309.0/1**

Art.-Nr./item-no./produit-no.

Nickel silver etched kit with 2 benches each with and without backrest, total 4 pieces  
also available as finished models, in a set with 4 pieces  
for the design of a modern platform

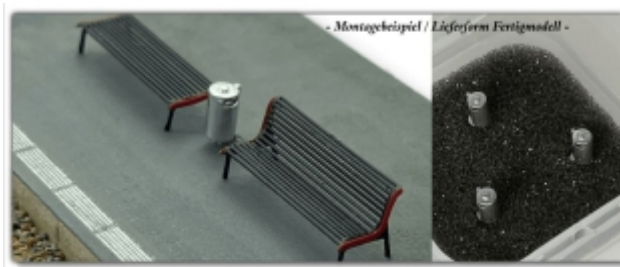

**Nm-Y00309:** moderne Sitzbänke, je 2 St. mit und ohne Rückenlehne, Ätzbaukasten oder Fertigmodelle (bitte angeben)

### Modern Wastebins

**Nm-Y00310**

Art.-Nr./item-no./produit-no.

3D-printed waste bins  
ready to install, chrome-coloured lacquered  
3 pieces in a set  
for the design of a modern platform

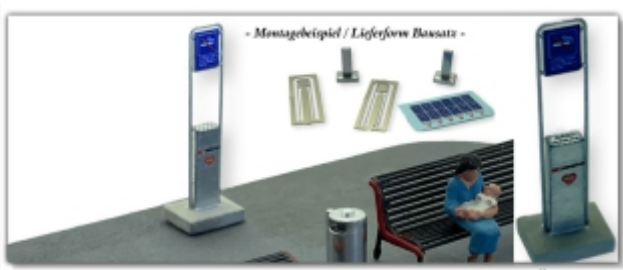

**Nm-Y00310:** moderne Mülleimer, 3 St. Fertigmodelle, chromfarben lackiert, einbaufertig, 3D-Druckteile

### Modern Ashtrays

**Nm-Y00311**

Art.-Nr./item-no./produit-no.

Kit with 2 modern ashtrays each  
consisting of a nickel silver etched part, a 3D printed part,  
as well as the matching decals for labelling  
for the design of a modern platform

**Nm-Y00311:** moderne Aschenbecher, 2 St., Bausatz mit Ätz- und 3D-Druckteilen, sowie Decals

### Ready-to-Play

The new accessories are solidly packed in attractive plastic boxes. A piece of foam cut to fit protects them from damage.

Enclosed is a short instruction for possible assembly or installation.

The etched part for the ashtray has to be put on the 3D-printed part and glued there. Paint as desired, or leave unpainted, cut out decals, water, slide on, let dry, done.

And instead of having to laboriously align the bin, simply drill a hole in the platform, insert the base there and glue it in place. And that's it.

We publish current prices and delivery dates on our website.

To keep up to date, we recommend that you subscribe to our newsletter.

### Kits

The kits have different levels of difficulty. Assembling the filigree benches is a little more difficult, which is why N-Track also offers ready-assembled benches. We do not usually have these in stock, but will be happy to order them for you in the Netherlands. Please allow a few weeks for delivery. Thank you for your understanding.

## Bumper with round Buffer

Nm-Y00331.0/1

Art.-Nr./item-no./produit-no.

Representation of a modern buffer stop, embedded in a concrete block, with round buffer plate.

2 pieces, 3D printed parts, ready painted available for N gauge (9mm) and Nm (6,5mm)

## Bumper with Standardbuffer

Nm-Y00332.0/1

Art.-Nr./item-no./produit-no.

Representation of a modern buffer stop, embedded in a concrete block, with standard buffer plate.

2 pieces, 3D printed parts, ready painted available for N gauge (9mm) and Nm (6,5mm)

## Bumper from Steel

Nm-Y00333.0/1

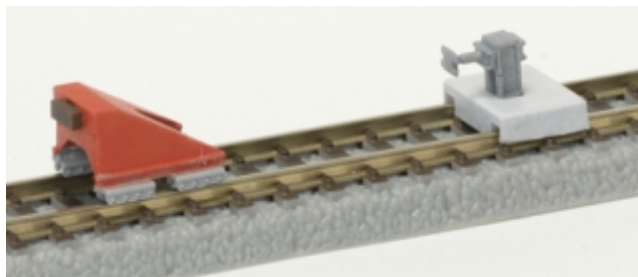

Art.-Nr./item-no./produit-no.

Representation of a modern buffer stop in triangular form optionally to be equipped with short or long buffer plank 2 pieces, 3D printed parts, ready painted available for N gauge (9mm) and Nm (6,5mm)

## Features

Finally, matching RhB buffer stops are available. Ready mounted and painted. Only with the red triangular buffer stop the model railroader has to decide whether he prefers to glue on the shorter or longer version of the enclosed wooden planks.

Red steel buffer stop in triangular shape, colour adapted by us and provided with grey retaining clips.

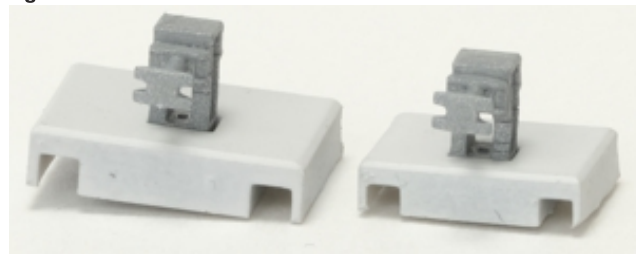

Each set contains two buffer stops that just have to be put on the track and glued there.

The picture shows the concrete block with a typical RhB buffer. In front the Nm gauge version, in the back the version for N gauge. We used Z-tracks from Rokuhan and N-tracks from Kato for the pictures.

Unpack - set up - assembly couldn't be easier!

In the enclosure it is mentioned with which colours the components were painted, so that a touch-up is easily possible if necessary. Of course, with a brush and some paint, the components can also be repainted into a different variant or aged a little.

Obviously, N-Track has now discovered its heart for N-modelers as well. The buffer stops are explicitly available for Nm gauge (scale 1:160, gauge 6.5mm) as well as for N gauge (scale 1:150, gauge 9mm). On the left in the picture the slightly larger N version.

## Deliveries

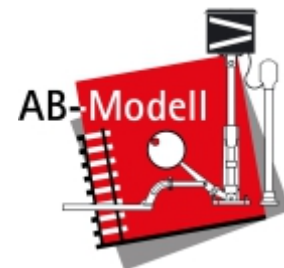

We have a small stock of all types available for immediate delivery. Replenishment usually arrives from the Netherlands within a few weeks, so that we can quickly send you the desired number of buffer stops.

We publish current prices and delivery dates on our website.

### N-Track Accessories

The announcement of the new accessories can definitely be seen as a surprise, as up to now N-Track was rather known for its Nm kits of rolling stock and an attractive overhead line.

From now on, fine accessories are also available.

What is pleasing is the far advanced state of delivery. All components have already arrived and are thus available just a few days after their announcement.

Another very pleasing fact is also that N-Track now takes care of the needs of N-modelers and has bumping blocks explicitly for N-gauge in its programme. These are somewhat larger than the Nm scale buffer stops and thus fit perfectly with the Kato/MDS/Pirata models in Japanese N scale. This should especially delight the many N railroaders who use the RhB models on standard N track material.

N-Track has grouped the accessories in a separate line called "Around the Railway". To avoid overlaps with our own number ranges, we have given some of our products new item numbers. However, these remain unchanged in design.

The modern components for the platform of this year's novelty programme fit perfectly with our accessories that have been available for a long time, such as timetable boards or platform markings.

The other accessories of this year's novelties consist of a more filigree overhead line, which is now built on very exemplary masts. In addition to this modern catenary, there is also a historical one with old lattice masts. A special highlight in our eyes are the functioning mast and track field lights, which are in no way inferior in filigree to the rest of the overhead line material.

We will present these interesting topics in the next newsletters and present the products to you in detail.

Thank you for your interest.

Yours
