advertising model of the building material dealer BARIT AG

Nm-011.5: RhB Niederbordwagen Kk-w 7324/7325, Messing-Handarbeitsmodell, BARIT AG

Modelfeatures

Our handmade models are made in our workshop in Sauerland, Germany, are made of etched brass or nickel silver and are solidly soldered and glued. The paint consists of at least three layers (primer, main paint, matt paint) and is finely applied by airbrush. Details are set off with a brush. The lettering is done with decals, which we have printed especially for our models.

All cars roll on double-sided insulated metal wheelsets of the gauge Nm. Use on 9mm standard gauge track is not possible. The Nn3-/Z-coupling from MicroTrainsLine is installed. The load of the carrying wagons comes from Minitrix and is purchased from us ready printed.

Availability

All pre-ordered vehicles have been produced. We will inform customers about the availability of the models at short notice. We are still accepting orders for the freight cars. For the two low side gondolas, the favourable pre-order price is still valid until 31.08.22.

The delivery of the reordered vehicles will take place after completion, probably in 2023.

Please note that the following applies to the container motifs and the low-sided wagon: Only while stocks last!

- Containers will not be reordered.
- The stock of kits for the low side car is running out. A new edition is not planned.

We publish current prices and delivery dates on our website.

To keep up to date, we recommend that you subscribe to our newsletter.

features	price/item-#
