

Dear friends of Swiss narrow-gauge railways,

as we did last year, we have put together a colourful range of new Swiss narrow-gauge products for you. These include two projects for newly designed traction units. The projects presented last year are almost ready for series production and will appear in 2024.

We hope you enjoy reading

Your

KT-051.51N: RhB Ge4/4^{III} 644, Savognin, Weltrekord-Fahrt, Spur N, mit N-Standardkupplung

Ge4/4^{III} 644 „Weltrekordfahrt“

Nm-207.4 / KT-051.51N/Nm

Art.-Nr./item-no./produit-no.

Model of the Rhaetian Railway advertising locomotive with reference to the world record run on 29th October 2022.

Available as

Nm-207.4 - small series handcrafted model, brass and nickel silver, two Faulhaber motors with flywheel mass, only available for Nm gauge

KT-051.51N/Nm - Plastic large series model, based on the Kato locomotive model, repainted and re-labelled, available for N and Nm gauges, optional free-standing handrails can be added

The Rhaetian Railway's world record of putting the world's longest passenger train on wheels has prompted us to offer this attractive model to our customers.

The first two tranches of the Kato models have already been sold. A third batch will be produced this year.

The handcrafted models are under construction and will be available from spring.

MOB - Ge4/4 8002/8004

Nm-208.3 / KT-022.1N/Nm

Art.-Nr./item-no./produit-no.

KT-022.1N: MOB Montreux-Oberland-Bahn Ge4/4 8002/8004 im modernen Regio-Design, für Spur N (9mm)

MOB

COMPAGNIE DU CHEMIN DE FER
MONTREUX OBERLAND BERNOIS

Model of the Montreux-Berner Oberland Railway universal locomotive in pearl white/night blue to match our MOB standard coach I.

Available as

Nm-208.3 - small series hand-built model, brass and nickel silver, two Faulhaber motors with flywheel, only available for Nm gauge

KT-022.1N/Nm - Plastic large series model, based on the Kato locomotive model, repainted, rebuilt and re-labelled, available for N and Nm gauges, optional free-standing handrails can be added

The series of models in this colour combination will be continued if there is sufficient interest.

FO-Luggage Car D4341

Nm-112.6

Art.-Nr./item-no./produit-no.

The four-axle luggage wagon of the Furka Oberalp Railway appears this year in the original version at the time of delivery in 1961 with a simple FO abbreviation. The model is painted in a dark red colour with silver doors.

The windows are barred vertically or horizontally as in the prototype.

Two vehicle numbers D4341 and D4342 are available.

Nm-112.6: Furka Oberalp Railway, baggage car D4341 - D4342, Nm gauge

Nm-112.6: FO Gepäckwagen D4341 - 4342, ursprüngliche Ausführung, mit silbernen Gepäcktüren, Furka-Oberalp

MTGN - Cogwheel Railcar Bhe 2/4 Nm-551.1

Art.-Nr./item-no./produit-no.

Nm-551.1: Bhe2/4 201ff. der Rochers-de-Naye-Bahn, Zahnradtriebwagen, motorisiert (angepasstes Industriefahrwerk)

The cog railway to Rochers-de-Naye, built in 1892, leads to one of the most spectacular panoramic mountains on Lake Geneva. The railway company purchased 5 Bhe2/4 railcars for electrification in 1938.

Our project is now well advanced. The 3D-printed body is elaborately painted, with raised etched lettering and inserted windows. A customised industrial chassis from Rokuhan is used as the drive. On request, we can convert the drive to can motors from sb-modellbau. The pantographs are from Sommerfeldt and are not electrically connected. With correct track construction, gradients of up to 25% are also possible in model operation.

Two vehicle numbers are produced: Bhe2/4 203 and 204 in ivory / sky blue, with silver roof.

Nm-551.1 - Montreux-Territet-Glion-Naye Railway, Bhe2/4 railcars 203, 204

Project Tmf 2/2 85 - 90 Nm-250.1

Art.-Nr./item-no./produit-no.

The N-Track company is currently constructing the Rhaetian Railway's Tmf 2/2 shunting tractor. The model is a completely new construction, with chassis and bonnet milled from brass, as well as fine etched parts for circulation, platform railings, driver's cab, roof, etc. The photo of the hand model on the right shows the project status as of November 2023. We are initially realising the traffic orange version as it was put into service at the beginning of the 1990s, with extensive lettering, modern RhB logo and technical address block. We will produce several vehicle numbers. A yellow version is planned for the future. The project status is so far advanced that we would like to give you a first look at the hand sample. Production will start at the end of 2024 at the earliest. We are happy to accept pre-orders.

Nm-250.1: RhB Tmf2/2 85-90, Rangierlok, verkehrsorange, mit Glockenankermotor, Handarbeitsmodell für Nm

Nickel silver handcrafted model with heavy brass running gear, drive on both axles by means of a can motor. Traffic orange with modern RhB logo, extensive technical address block, corresponding to the 1990s.

Nm-250.1: Tmf 2/2, three different road numbers

Project Tm 2/2 92 Nm-251.x

Art.-Nr./item-no./produit-no.

Nm-251.x: RhB Tm2/2 91-92, Rangierlok, gelb, Projekt Klett-Modellbau, Spur Nm, Gehäuse 3D-Druck

The model will be realised as a 3D printed housing. Details of the drive (Faulhaber motor) and detailed equipment will follow as soon as known. Manufacturer Klett-Modellbau

Nm-251.x: Tm2/2 92, service tractor, yellow with silver roller doors

Another new project is the yellow Tm2/2 92 service tractor of the Rhaetian Railway.

The model is being designed and later manufactured by Klett-Modellbau. The body will be a 3D-printed component with inserted windows.

We have started talks with some manufacturers to find a solution for the drive, with a view to motorise the tiny model with a Faulhaber-type motor. We will clarify details on the outstanding issues in the course of the year and inform interested parties via newsletter.

Pre-orders will be accepted.

Whether we will also produce the slightly different version of the Tm2/2 91 at a later date has not yet been finalised.

Preise und Liefertermine stellen wir auf unserer Internetseite zur Verfügung.

Container Carrier Lb-v Nm-013.16

Art.-Nr./item-no./produit-no.

Nm-013.16: RhB Lb-v 7863, Tragwagen mit Coop-Kühlwechselbehälter Edellieschen (Minitrix), für Nm (6,5mm)

This is a nickel silver hand-built model of the type Lb-v two-axle carrying car with a new car number and a new Coop refrigerator swap body with an Edellieschen motif (Minitrix, plastic).

Only available for the Nm gauge.

Additional interchangeable containers are only available while supplies last.

Nm-013.16: Lb-v 7863 with Coop Edellieschen refrigerator swap body

The model containers come from the Minitrix programme, are injection-moulded from plastic, elaborately labelled on all four sides using pad and direct printing and have a weight glued in. The legs of the swap body are already glued under the container model by us.

If you want to create a stand model for your system, we can also include the legs separately.

The colourful eye-catchers have a magnet glued underneath and thus adhere to the carrier trolley.

Container Carrier Sb-v Nm-019.16

Art.-Nr./item-no./produit-no.

This is a nickel silver hand-built model of the type Sb-v four-axle low-floor passenger car with a new car number and a new Coop refrigerator swap body with an Edellieschen motif (Minitrix, plastic).

The model is only available for the Nm gauge.

Additional interchangeable containers are only available while supplies last.

Individual swap bodies are available on request.

Nm-019.16: Sb-v 7729 with the Coop Edellieschen refrigerator swap body

Nm-019.16: RhB Sb-v 7729, Tragwagen mit Coop-Kühlcontainer Motiv Edellieschen (Minitrix), für Nm (6,5mm)

Nm-019.11: RhB Sb-v 7719/7724, Tragwagen mit Holcim-Tankcontainer (Kunststoff, Fleischmann), Nm (6,5mm)

Container Carrier Sb-v Nm-019.11

Art.-Nr./item-no./produit-no.

This is a nickel silver hand-built model of the type Sb-v four-axle low-floor boxcar, with two new car numbers, each loaded with a Holcim Group tank container for transporting cement (Fleischmann, plastic).

The model is only available for the Nm gauge.

Two different road numbers are available for the swap body (only while stocks last).

Nm-019.11: Sb-v 7719 with Holcim tank swap body
Sb-v 7724 with Holcim tank swap body

From 2001, the RhB procured a larger fleet of low-floor wagons in order to better utilise the clearance gauge of the mountain railway. The wagons "with the kink" can be loaded and unloaded at the station using a gantry crane or a so-called reach stacker. As a rule, the swap bodies are reloaded onto an appropriately equipped lorry, which takes over the fine distribution of the goods.

This year, we are realising the Sb-v model based on our well-known low-floor carrier wagon.

The vehicle type is labelled as Sb-v and not Sbk-v, as found on prototype too.

S = special design with bogies

b = carrier wagon with container

(k = less than 30 tonnes load weight)

v = electric heating cable

We offer the model with two new and different vehicle numbers. The tank containers also have two operating numbers.

Transporter Wagon Ua

Nm-021.0 Nm-021.1

Art.-Nr./item-no./produit-no.

Nm-021.0: RhB Ua 8331-8335, Rollschemel, unbeladen, 3D-Druck, Handarbeitsmodell für Nm (6,5mm)

Nm-021.1: RhB Ua 8336-8242, Rollschemel, unbeladen, 3D-Druck, Handarbeitsmodell für Nm (6,5mm)

3D-printed transporter wagons, elaborately reworked and painted. The models are technically designed as "two-axle models" to ensure safe operation.

We offer two variants: the wheel chock bar at the top, to which the "brake blocks" are attached so that they can be moved to immobilise the ballasted wagons, is continuous on the Nm-021.0 model and split on the Nm-021.1 model. We offer 5 vehicle numbers for each type.

The models within a series have different handbrake wheels, as shown in our illustrations.

The model is only available for the Nm track gauge.

Nm-021.0 - Transporter wagon with continuous wheel chock bar
Ua 8331, Ua 8332, Ua 8335 - red handwheel with 5 spokes
Ua 8333 - red handwheel with 4 spokes
Ua 8334 - yellow handwheel with 5 spokes

Nm-021.1 - Transporter wagon with split wheel chock bar
Ua 8336, Ua 8338, Ua 8340 - grey handwheel with 5 spokes
Ua 8341 - red handwheel with 5 spokes
Ua 8342 - red handwheel with 4 spokes

Please select the preferred vehicle numbers when ordering.

Due to the low weight, we recommend that you load the models during operation. Assuming that the wheelsets of the ballasted vehicles comply with the standards, the transporter wagon can be loaded with a model with a maximum axle distance of 31.5 mm. Unloaded vehicles should always be placed at the end of a train formation.

We will be publishing details on operation with the transporter wagons in a special newsletter at a later date.

To make your selection easier, we offer suitable standard-gauge freight wagons for loading.

You can choose from the following:

Nm-021.xG - Tgpps grain wagon from Aare Valley Models

Nm-021.xK - K³ covered box car from Hobbytrain (Lemke)

Nm-021.xT - tankwaggon Danzas, Basel from Hobbytrain (Lemke)

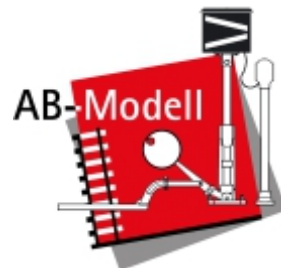

Note: The x in the order number is replaced by the "0" or "1" of the base model.

The freight cars are high-quality models from well-known manufacturers that run excellently on N track. At least two different vehicle numbers are available for each load type, so that even the loaded wagons do not have duplicate numbers.

The models are supplied with standard N couplers that can simply be inserted into the pick-up shaft.

On request, the transporter wagon can be purchased as a non-rollable stand model.

Rhätische Bahn

Ferrovia retica
Viafier retica

Transporter wagons are used to transport standard-gauge wagons on narrow-gauge carrier vehicles. This saves time-consuming reloading from a standard-gauge goods wagon to a narrow-gauge one.

The vehicles shown here were put into operation in the mid-1950s.

With the emergence of container transport, the importance of these vehicles has steadily declined, so that the majority of the transporter wagons have now been withdrawn from the fleet or converted into service vehicles.

Grain Wagon

Nm-021.xG

Art.-Nr./item-no./produit-no.

Nm-021.xG: Beladung für Nm-Rollschemel, Tgpps Getreidewagen (Spur N, Aare Valley Models)

K³ Box Car

Nm-021.xK

Art.-Nr./item-no./produit-no.

Nm-021.xT: Beladung für Nm-Rollschemel, gedeckter Güterwagen K³ (Spur N, Hobbytrain)

Tank-/Vesselwagon

Nm-021.xT

Art.-Nr./item-no./produit-no.

Nm-021.xT: Beladung für Nm-Rollschemel, Danzas Tankwagen (Spur N, Hobbytrain)

Track Scales

Zub-345.1/2

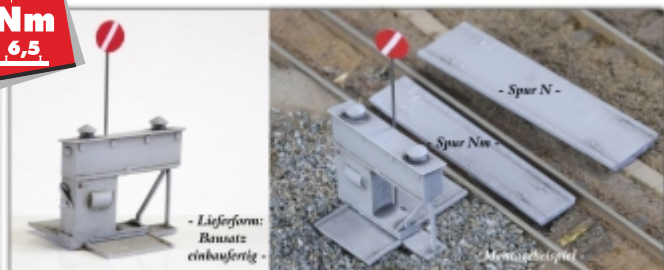

Art.-Nr./item-no./produit-no.

3D-printed track scale in 1:160 scale with track inserts suitable for N (9mm) and Nm (6.5mm) gauges.
Manufacturer Klett-Modellbau

Available as

Zub-345.1: Track scales, static

Zub-345.2: Track level, motorised with servo, for turning the signal disc by 90° and back again

Zub-345.1: Gleiswaage, Typ Filisur, 1 Stück, 3D-Druck, einbaufertig lackiert, für N- und Nm-Gleis, Klett-Modellbau

Track Scales

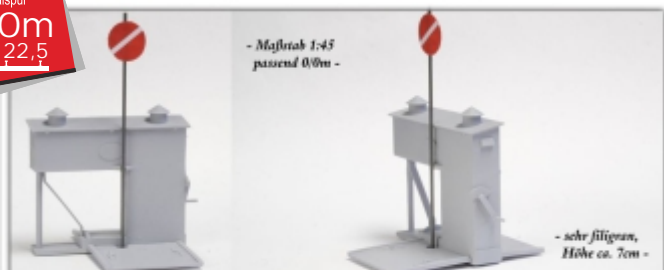

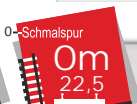

Zub-345.3/4

Art.-Nr./item-no./produit-no.

3D-printed track scales on a scale of 1:45. Suitable for tracks 0 to 0m.
Manufacturer Klett-Modellbau

Zub-345.3: Track scales, static, 1:45

Zub-345.4: Track scales, motorised with servo, 1:45

Zub-345.3: Gleiswaage, Typ Filisur, 1 Stück, 3D-Druck, einbaufertig lackiert, statisch, 1:45, Klett-Modellbau

Hippsche Wendescheibe

Zub-346.1/2

Art.-Nr./item-no./produit-no.

Zub-346.1: Hippsche Wendescheibe, 1 Stück, 3D-Druck, einbaufertig lackiert, statisch, 1:160, Klett-Modellbau

3D-printed Hippsche Wendescheibe (Hipp turning disc) in 1:160 scale, suitable for N (9mm) and Nm (6.5mm) tracks.
Manufacturer Klett-Modellbau

Available as

Zub-346.1: Hipp turning disc, static

Zub-346.2: Hipp turning disc, motorised by means of a geared motor to turn the signal disc in one direction like a clockwork.

Decalset 50 years Bernina Express

KT-111.3/4/5/6

Art.-Nr./item-no./produit-no.

We offer four different decal sets for redecorating the well-known Kato models of the Bernina Express in order to give the red or already Bernina Express-labelled panoramic coaches the current appearance with the 50th anniversary logo. The set also includes new vehicle numbers.

Due to a lack of capacity, we only offer the decal sets. Unfortunately, it is not possible for us to redecorate them.

KT-111.3: Decalset für Kato's Bernina Express, Umdekoration „50 Jahre“ BEX, großes Komplettsset für 2 Wagen

KT-111.5: Decalset für Kato's Bernina Express, Umdekoration „50 Jahre“ BEX, Komplettsset für 2 Wagen

KT-111.4: Decalset für Kato's Bernina Express, Umdekoration „50 Jahre“ BEX, großes Komplettsset für 4 Wagen

KT-111.6: Decalset für Kato's Bernina Express, Umdekoration „50 Jahre“ BEX, Komplettsset für 4 Wagen

Saltboxes

Nm-Y00312

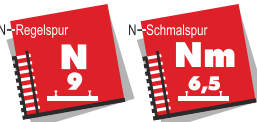

Art.-Nr./item-no./produit-no.

Nm-Y00312: Salz-/Streugut-Behälter, fertig lackiert, 2 Stück, 3D-Druckteile, Spuren Nm oder N

The Dutch company N-Track has once again planned a whole host of new accessories this year. We already have photos of some of these announced new products.

All products are suitable for ...

3D-printed salt/grit containers, as can be found everywhere at railway stations.

The models are ready-painted and can be used on the layout straight from the packaging.
Manufacturer N-Track

Nm-Y00312: 2 pieces salt / grit containers

RhB-Ticket Machine

Nm-Y00322

Art.-Nr./item-no./produit-no.

Finished model of an RhB ticket machine of the latest generation.
The model is illuminated with LEDs and very finely labelled.
Manufacturer N-Track

Nm-Y00322: RhB ticket machine, illuminated

Selecta-Vending Machine

Nm-Y00321

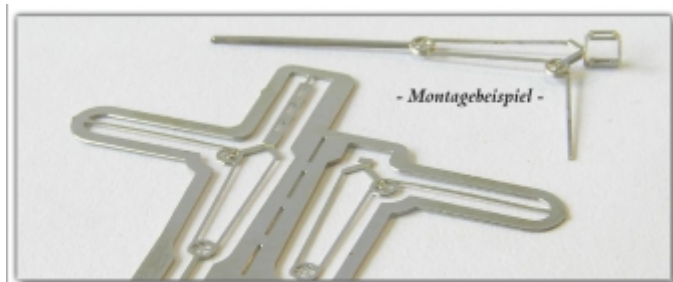

Art.-Nr./item-no./produit-no.

Kit for a model of a Selecta vending machine.
The model is illuminated by LED and very finely labelled.
Manufacturer N-Track (without illustration)

Nm-Y00321: Selecta vending machine, illuminated, kit

Nm-Y00322: RhB Fahrkartenautomat, fertig lackiert, beleuchtet, 3D-Druckteil, Spuren Nm oder N

Nm-Y00070: Spannwerk Bausatz, 2 Stück (N-Track)

Wheel Tensioning - finescale

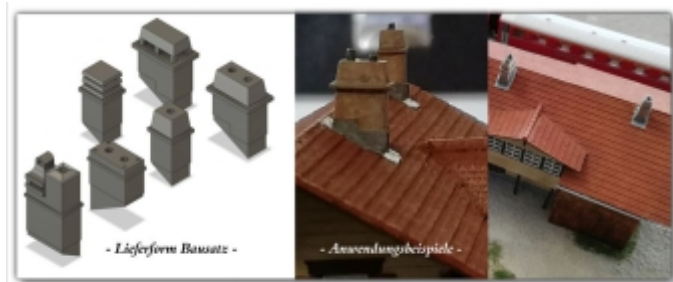

Nm-Y00170

Art.-Nr./item-no./produit-no.

Mixed kit made of etched nickel silver sheet for the representation of the wheel tensioning mechanism, with 3D-printed weight replicas. Finescale version for 1.5x1.5mm H-profile masts.

The illustration opposite shows the Sommerfeldt-compatible version (Nm-Y00070).
Manufacturer N-Track

Nm-Y00170: Wheel tensioning device, kit, finescale

Zub-352.1: typische Schornsteine, 3D-Druck, zur individuellen Colorierung, 6 Stück im Set, inkl. Messingrohr

Chimneys

Zub-352.1

Art.-Nr./item-no./produit-no.

3D-printed chimneys, 6 pieces in a kit, different types, including brass pipe, for customising roofs.

Manufacturer N-Track
Exclusively for AB-Modell

Zub-352.1: Chimneys, kit, 6 pieces

On Our Own Behalf

The prices for our models remain virtually unchanged this year. Adjustments will mainly be made where the base materials have become significantly more expensive or where our prices differ significantly from the manufacturer's recommended retail price. Prices that have already been confirmed remain valid as usual.

Please note that we only produce our models for a limited period of time and in limited quantities. Some of the new products presented here will not be available until next year.

We would like to draw your attention to our new re-gauging service for Kato models. We no longer carry out re-gauging ourselves, but pass it on to our friend and business partner Marco Schilensky. Visit his website

www.meterspur-schweiz.com
for additional information.

We publish current prices on our website at
www.n-schmalspur.de.

To stay up to date, please subscribe to our newsletter.
Thank you very much.
