

Novelties Delivery

New Locos From MDS

After the new freight wagons have already been in our warehouse for a few days, MDS has now also delivered the new locomotives. We have summarised all the details for you in today's newsletter.

We hope you enjoy reading it.

Yours

AB-Modell-Team

The long awaited Ge4/4" locomotives have now arrived and are therefore available at short notice. Please note that we do not keep large stocks in stock and that delivery times may take a few days.T

The adjacent advertising locomotive promotes the fund-raising campaign for the re-commissioning of the first steam locomotive of the Rhaetian Railway G3/4 No. 1 'Rhätia'. Every model sold will contribute EUR 5 to the historic RhB's donation fund, which will be used directly for the preservation and recommissioning of these historically valuable treasures.

New Locomotives

The four new locomotives are another colourful mix for the model railway.

As is usual with the Kato models, the locomotives are produced on a scale of 1:150. They run on 9mm track (N gauge). Conversion to N metre gauge (6.5mm, Z gauge track) is still not possible and is not offered.

A faulhaber-type motor operates in the running gear, which is designed for 12 volts and drives all axles in the two bogies. The pantographs are moulded from grey plastic and have no function.

Fine etched parts round off the overall appearance of the model.

All N models can be hauled immediately with the N standard coupler. Anyone who has converted their models to the Kato short coupling can also do this with the MDS models. To do this, the snow plough is unscrewed, the coupling replaced and the plough reattached under the front. If you wish, we can carry out the coupling conversion for you.

All models are offered in three equipment variants.

The locomotives are available in analogue as standard.

Digitised models and digital locomotives with sound are also available ex works. Digital drivers should order a digitalised or sound locomotive directly from us, as we do not carry out digital conversions and installations in our workshop.

MD-60015.N: RhB Ge4/4" 619 blau, Werbemod. Südostschweiz, Spur N (9 mm), N-Kupplung, MDS-Modell

Novelties Delivery

New Locos From MDS

New Prices!

As was to be expected, the massive price increases in recent years have also left their mark on MDS and its Asian manufacturer. MDS has therefore announced that it will implement a significant price increase on 01.12.2024!

All pre-orders will receive the models at the announced pre-order price. For all orders that we receive by 20 November 2024 and whose locomotives we can still purchase in time before the price increase, the prices below also apply.

For orders arriving later, we will also try to maintain the favourable conditions for you, but cannot promise this. So if you are considering a model, please be sure to order by

29.11.2024 - 10.00 a.m.

Offer subject to change. We do not hold any stock!

As soon as we know the new prices, our newsletter will be updated.

MDS has announced that the digitised and sound versions will not be delivered until December due to the current high order volume. Again, if you order in time, you will also receive those models at today's conditions!

Conversions

In contrast to the goods wagons, we have not worked out the possibility of converting the locomotives to N narrow gauge. The models are therefore only available for N gauge until further notice.

We can carry out a possible conversion to the Kato short coupling for you on request.

Deliveries

Due to the variety of technical features of the models and the large number of motifs, we do not keep any locomotives in stock. Locomotive models are regularly reordered from MDS.

Please be prepared for delivery times of a few days for analogue models and a few weeks for digitised models. Thank you for your patience.

Pre-orders will be informed by us shortly about the availability of the models and the dispatch will be coordinated. These models are already in stock and reserved for you.

Deliveries will be made in the order in which orders are received. New orders will be invoiced at the new prices. See also our note at the top of the page.
